AR SHIPPING WORLD

Vendor Account Plans

Basic Account | Smart Account | Pro Account

Plan descriptions, eligibility, registration charges, listing allowances, and zone permissions

1. Purpose and Overview

This document describes the proposed vendor account structure for AR Shipping World. It explains the purchasing and selling options, registration requirements, fees, free listing allowances, category restrictions, and geographic-zone permissions for each account tier.

The account plans are designed to let users begin with purchasing, start selling with a Basic Account, and upgrade to Smart or Pro as their business and cross-zone needs grow.

2. Account Plan Comparison

Feature	Basic Account	Smart Account	Pro Account
Purchasing	Free purchasing account; buying may also be available without an account.	User must first have a Basic Account, then upgrade.	Private users: after 3 months; companies/professional sellers: direct creation allowed.
Registration charge to sell	Europe: free. Pakistan: PKR 1,000.	EUR 2.99 or PKR 3,000.	EUR 5 or PKR 5,000.
Free listings in own zone	10	25	50
Free listings in other zones	Not included in stated Basic benefits.	5 free listings in other zones; user may choose own zone plus one additional zone.	15 free listings in other zones; may choose one, two, or all zones.
Categories	Single category only.	Single-category or multiple-category listings in own zone; cross-zone listing rules apply.	Single-category or multiple-category listings in own zone; cross-zone listing rules apply.
Additional listings	Charges per listing under AR Shipping World policy.	Charges per listing under AR Shipping World policy.	Charges per listing under AR Shipping World policy.
Buy and sell	Yes, subject to account and applicable requirements.	Yes.	Yes.
Application / terms	Selling application form and acceptance of Terms and Conditions.	Required information form and acceptance of Terms and Conditions.	Required information form and acceptance of Terms and Conditions.

Note: “Zone” means a geographic market or region configured by AR Shipping World (for example, Europe, Pakistan, or America). The final zone definitions and the exact way listing allowances are counted should be set in the platform policy.

3. Basic Account

The Basic Account is the entry-level option. It supports purchasing and, where the user registers as a seller, a limited selling capability with a single-category and own-zone focus.

A. Purchasing Account

- A purchasing account can be created free of charge.
- Users may be able to buy products without creating an account, as well as buy while signed in with an account.
- Guest purchasing may be subject to checkout, payment, delivery, and other platform requirements.

B. Selling Account

- The user must complete the selling application form with all required information.
- The user must read and accept AR Shipping World’s Terms and Conditions before the selling account is activated.
- Registration charge: free for sellers in Europe; PKR 1,000 for sellers in Pakistan.
- A Basic seller can buy and sell products.
- The account includes up to 10 free listings.
- The seller may list products in one category only.
- Listings are limited to the seller’s own zone.

- Listings beyond the free allowance are charged per listing according to AR Shipping World policy.

4. Smart Account

The Smart Account is an upgraded selling option for users who already have a Basic Account and want a larger listing allowance, multiple-category options, and limited access to an additional zone.

Eligibility and Registration

- The user must first create a Basic Account and then upgrade to Smart Account.
- The user must complete the required information form and accept the Terms and Conditions.
- Registration charge: EUR 2.99 or PKR 3,000 to start selling with Smart Account.

Benefits and Limits

- The user can buy and sell products.
- Includes up to 25 free listings in the user's own zone.
- The user may list in a single category or across multiple categories in the user's own zone.
- Includes up to 5 free listings in other zones, such as Europe or America, subject to the selected zone rules.
- The user may select the home zone plus one additional zone.
- Listings beyond the included free allowances are charged per listing according to AR Shipping World policy.

Cross-zone clarification: the stated "5 free listings in other zones" allowance is separate from the 25 free listings in the own zone unless the published policy explicitly says otherwise. The platform should define how the five listings are allocated within the one additional zone.

5. Pro Account

The Pro Account is the highest tier described in this plan. It is intended for established private sellers, companies, and professional sellers that need a larger listing allowance and broader geographic reach.

Eligibility and Registration

- Private users may apply for Pro Account after holding an account for at least three months.
- Companies and professional sellers may create a Pro Account directly, subject to verification and platform approval.
- The user must complete the required information form and accept the Terms and Conditions.
- Registration charge: EUR 5 or PKR 5,000 to start selling with Pro Account.

Benefits and Limits

- The user can buy and sell products.
- Includes up to 50 free listings in the user's own zone.
- The user may list in a single category or across multiple categories in the user's own zone.
- Includes up to 15 free listings in other zones, such as Europe or America, subject to the selected zone rules.
- The user may list in one zone, two zones, or all zones together.
- The user may create single or multiple listings in other zones, within the included allowance and platform rules.
- Listings beyond the included free allowances are charged per listing according to AR Shipping World policy.

Cross-zone clarification: the 15 free listings in other zones should be treated as a total allowance across selected additional zones unless AR Shipping World decides to assign an allowance per zone. This should be stated clearly in the final public policy.

6. Listing Fees and Policy

Each account tier includes a stated number of free listings. When a seller exceeds the relevant allowance, additional listings may be charged according to the AR Shipping World Listing Fee Policy.

- The per-listing fee amount is not specified in the supplied plan and must be published separately.
- The policy should clarify whether listing fees are one-time, recurring, or time-limited.
- The policy should explain whether expired, deleted, rejected, or renewed listings count toward the allowance.
- The policy should specify whether cross-zone listings count separately for each zone.
- Any applicable taxes, payment processing charges, refunds, and fee changes should be addressed in the platform terms.

7. Registration and Activation Process

1. Choose the appropriate account option or sign in to an existing account.
2. For a selling account, complete all required application fields and provide any requested supporting information.
3. Review and accept the current AR Shipping World Terms and Conditions and applicable seller policies.
4. Pay the applicable registration charge, if any, using a supported payment method.
5. Complete any identity, business, or seller verification required by AR Shipping World.
6. After approval and activation, create listings within the account's category, listing-count, and zone limits.
7. Monitor listing usage and pay any additional listing fees required by the current policy.

8. Recommended Policy Definitions Before Launch

The following points should be finalized before this document is used as a binding customer-facing policy:

- Define "zone" and publish the list of available zones (for example, Europe, Pakistan, and America).
- Confirm whether the Smart and Pro cross-zone free listing allowances are total allowances or allowances for each additional zone.
- Clarify whether Basic Account sellers in Pakistan pay PKR 1,000 once at registration and whether any renewal fee applies.
- Clarify how private users qualify for the three-month waiting period before Pro Account eligibility.
- Define verification requirements for companies and professional sellers applying directly for Pro Account.
- Publish exact charges for listings beyond each free allowance and explain when those charges are collected.
- Clarify whether an account's free listing allowance resets monthly, annually, or never; this has not been specified.
- Specify rules for listing approval, prohibited products, returns, disputes, seller conduct, and account suspension in the relevant policies.

9. Short Customer-Facing Summary

Basic Account — A simple starting point for purchasing and selling in one category and one zone. Purchasing is free; selling registration is free in Europe and PKR 1,000 in Pakistan. Includes 10 free listings.

Smart Account — For sellers who need more listings and access to one additional zone. Registration is EUR 2.99 or PKR 3,000. Includes 25 free listings in the own zone and 5 free listings in other zones.

Pro Account — For established private sellers, companies, and professional sellers seeking broader reach. Registration is EUR 5 or PKR 5,000. Includes 50 free listings in the own zone and 15 free listings in other zones, with access to one, two, or all zones under the platform policy.

10. Important Notice

This document organizes the proposed account features based on the information supplied for AR Shipping World. It is a product and policy draft, not legal advice. Before publication, AR Shipping World should confirm all fees, eligibility rules, geographic restrictions, and listing-count definitions and have the Terms and Conditions reviewed for the countries in which the platform operates.
